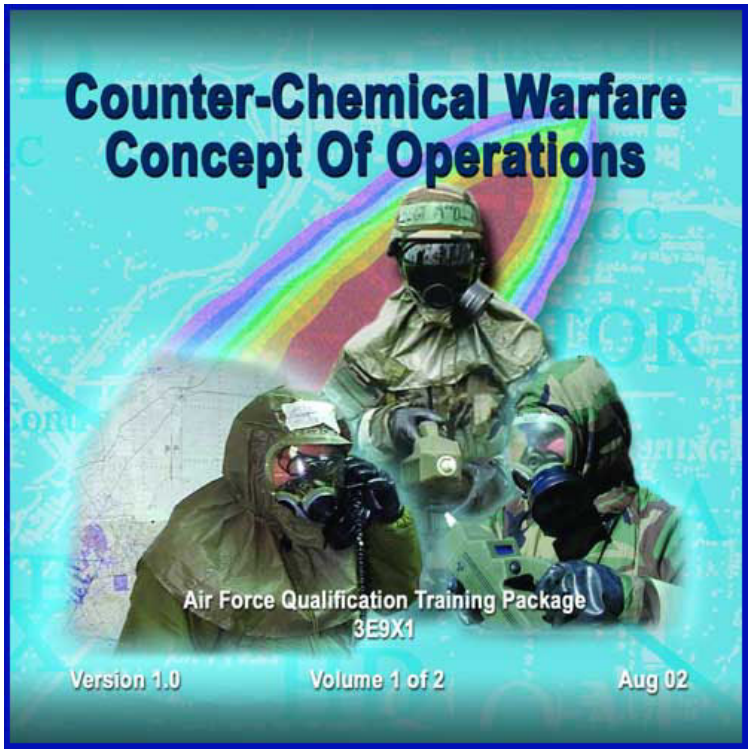
TARGET AUDIENCE: Environmental and Operations Flights

Air Force Qualification Training Package (AFQTP) For AFS 3E9X1, Volume 1 of 2

SYNOPSIS



HQ AFCESA/CEXR, in association with Applied Research Associates, Inc., has recently completed a new AFQTP CD-ROM – Counter-Chemical Warfare Concept of Operations (CONOPS). This computer-based software program presents procedural guidance for tasks identified in the Specialty Training Standard portion of the Readiness Career Field Education and Training Plan.

This AFQTP presents the new Counter-Chemical Warfare CONOPS for civil engineer Readiness technicians and was developed using the information in (Draft) AFMAN 10-2602, *Nuclear, Biological, Chemical, and Conventional Defense Operations and Standards*.

Lesson one provides an overview of the program and discusses the history of the Air Force Counter-Chemical Warfare CONOPS.

Description and impact of the chemical threat is described in lesson two.

Lesson three describes chemical detection/identification and reporting procedures. Vapor-Liquid-Solid (VLS) Track and Hazard Prediction and Assessment Capability (HPAC) instructions are available for download in this lesson.

Contamination avoidance policies and procedures are discussed in lesson four.

This CD-ROM is Volume 1 of a two-volume set on the Counter-Chemical Warfare CONOPS. Volume 2 of 2 is scheduled for completion in December 2002.

A course completion certificate is included at the end of each volume.

The AFQTP uses narration, video clips and over 400 photographs and illustrations that present technical information in an easy to understand format. Lesson review questions are included in both volumes.

ACCESSIBILITY:

Initial distribution has been made. For questions regarding this program, or to obtain additional copies of this and other CD-ROM products, contact CMSgt Thomas Morris.
