

HOLLOMAN AFB, NM UTILITY SYSTEM DESCRIPTIONS

System Descriptions: The following information is only an estimate of the size, scope, and general description of the natural gas and wastewater utility systems at the base and is subject to change. Holloman AFB occupies approximately 59,827 acres of real estate in Otero County, New Mexico.

Natural Gas: Holloman AFB does not generate its own natural gas. The natural gas distribution system consists of approximately 390,803 linear feet of polyethylene piping. Lines vary in diameter from 1 to 6 inches.

Sanitary Wastewater: The wastewater collection system consists of approximately 424,763 linear feet of piping. Main lines are constructed of concrete and vary in diameter from 6 to 8 inches. The wastewater treatment plant has a design flow of 1.5 million gallons per day. Treatment consists of preliminary, biological, chlorine disinfectant and removal, and aerobic sludge digestion and dewatering.
