TARGET AUDIENCE: Operations & Readiness Flights

MAAS Video Released Soon On DVD

SYNOPSIS:

All-new Mobile Aircraft Arresting System (MAAS) training medium for CAT I home-station training is scheduled to be released on DVD in August 2004.

DETAILS:

The new DVD will replace video #608185. It will address the MAAS upgrades to include the bidirectional and heavyweight configuration sets, the lightweight fairlead beam configuration set, the new Stanley hydraulic tools, and the new Mobile Runway Edge Sheave. It also discusses periodic inspections, preventive maintenance requirements, troubleshooting, and removal procedures. The three-part DVD runs approximately one hour, and will better prepare electrical and power production personnel to meet the full range of tasks expected in a contingency environment.

DISTRIBUTION:

The initial distribution will be sent in DVD format to all CE squadrons, as well as units that have 3E0X1 and 3E0X2 personnel assigned. Units without DVD playback capabilities can order the VHS tape format from a limited stock available through DOD JVISDA. Mail a request to JVISDA, Building 3/Bay 3, 11 Hap Arnold Blvd., Tobyhanna, PA 18466-5102 or visit <http://dodimagery.afis.osd.mil/davis/> to submit a request online.
